

## Grouping Method

The following figure is a sample which demonstrates the grouping.

In the first grouping, teacher groups students based on their mathematical ability. Teacher will make sure there are some students with good leadership or communication skills in each group to ensure smooth group discussion.

The second grouping is just generated by the computer by picking one student from each of the 4 groups.

First Grouping (Group by Mathematical Ability)			
Group 1 (Worksheet 1)			Group 3 (Worksheet 3)
Annie	Bianca		Alan
Candy	Donald		Calvin
			Debbie
Group 2 (Worksheet 2)			Group 4 (Worksheet 4)
Angel	Ben		Anthony
Connie	Derek		Cali
			Daniel
Second Grouping (Mixing Four Groups from First Grouping)			
Group 1			Group 3
Annie	Alan		Bianca
Angel	Anthony		Ben
			Brenda
Group 2			Group 4
Candy	Calvin		Donald
Connie	Cali		Derek
			Daniel
